

Communication Plan & Stakeholder Management

Date:	08 October 2026	Team ID:	UNM1611JASON
Project Name:	AI BlogNest API	Maximum Marks:	1 Mark

Communication Strategy:

Effective communication ensures clear milestone tracking, rapid issue resolution, and a well-coordinated final demonstration for evaluators.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose & Agenda
1	Team Standup	Daily	Discord / Slack	Project Lead / Devs	Review daily tasks, API integration status, and unblock dependencies.
2	Progress Update	Weekly	GitHub Projects	Full Team	Track completed user stories against agile sprint timeline and burn-down.
3	Issue & Bug Triage	As Needed	GitHub Issues	Dev & QA	Log and resolve edge cases (e.g. Gemini rate limits, token expiration).
4	Stakeholder Review	Bi-Weekly	Google Meet	Mentor & Evaluator	Present functional demos, gather feedback, and align with rubric.
5	Demo Rehearsal	Once	VS Code Live	Demo Presenter	Full dress rehearsal validating Thunder Client flows and screen recording.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Root Cause	Resolution & Action Taken
1	Gemini API Free Tier Rate Limits	15 requests per minute limit during multi-endpoint testing.	Implemented exponential backoff and cached common test prompt outputs in Thunder Client.
2	Mongoose Schema Desynchronization	Adding authorName requirement to existing documents.	Created database migration script to backfill authorName across legacy MongoDB entries.
3	Postman Environment Variable Sharing	Token was not persisting between separate test tabs.	Automated collection-level test script to auto-set {{token}} on successful /login response.
