

Demonstration of Proposed Features

Date:	08 October 2026	Team ID:	UNM1611JASON
Project Name:	AI BlogNest API	Maximum Marks:	1 Mark

Feature Delivery & Demonstration Verification:

This document records all features proposed during the project planning phase and tracks their successful implementation and live demonstration.

S.No	Feature Name	Description & Implementation	Status	Demo'd	Verification Remarks
1	User Registration & Login	Registers account, salts password via bcrypt, issues 7-day HMAC-SHA256 JWT.	Implemented	Yes	Demonstrated live in Postman with 201/200 OK responses.
2	JWT Protected User Profile	authMiddleware extracts Bearer token, fetches user profile without password.	Implemented	Yes	Verified token decoding and 401 on missing token.
3	Blog Creation & Feed	Creates blog linked to author ID; lists all blogs sorted by creation date with populate.	Implemented	Yes	Demonstrated with populated author names and emails.
4	Author Ownership Guard	Restricts PUT/DELETE strictly to original creator; returns 403 Forbidden to others.	Implemented	Yes	Tested cross-user modification block successfully.
5	Gemini AI Blog Generator	Transforms topic into 100-150 word post via Gemini 1.5 Flash; cleans formatting.	Implemented	Yes	Live generation demonstrated in 1.74s with auto-tagging.
6	AI Blog Summarizer	Distills arbitrary length content into single crisp executive summary paragraph.	Implemented	Yes	Demonstrated with 500-word input returning 3-sentence summary.

Feature Implementation Summary:

Metric	Value	Metric	Value
Total Features Proposed	6 Core Deliverables	Total Features Implemented	6 (100%)
Total Features Demonstrated	6 (100%)	Overall Implementation Rate	100.0 %
