

Project Demo Planning Template

Date:	08 October 2026	Team ID:	UNM1611JASON
Project Name:	AI BlogNest API	Maximum Marks:	1 Mark

Demo Structure & Rehearsal Schedule:

A structured demo plan ensures all technical features, architectural decisions, and evaluator requirements are showcased coherently within the allotted presentation window.

S.No	Demo Section	Description & Live Content	Duration	Presenter
1	Intro & Architecture	Project background, problem statements, MVC structure, and tech stack introduction.	1.5 mins	Sharvesh
2	User Authentication Flow	Live registration and login via Thunder Client, inspection of JWT and bcrypt hash in MongoDB.	2.0 mins	Sharvesh
3	Blog CRUD & Ownership	Creating, listing with populate, updating, and demonstrating 403 Forbidden access control.	2.0 mins	Sharvesh
4	Gemini AI Blog Generation	Calling /api/ai/generate-blog, showcasing sub-2s generation, regex cleaning, and auto-tagging.	2.5 mins	Sharvesh
5	AI Blog Summarization	Submitting 1000-word text to /api/ai/summarize, displaying single executive summary paragraph.	1.5 mins	Sharvesh
6	Code & Performance Review	Codebase walkthrough, performance metrics, and answering evaluator technical questions.	2.5 mins	Sharvesh

Demo Flow Summary:

Step	Activity	Demonstration Notes & Evaluator Highlights
Step 1	Introduction & Problem Statement	Highlight challenges of manual blogging and benefits of turnkey REST AI backend.
Step 2	Solution & Architecture Overview	Walk through Express MVC architecture, MongoDB schemas, and Google Gemini integration.
Step 3	Live Feature Demonstration	Execute 10-request Thunder Client collection live: Auth, CRUD, AI Generation, Summarization.
Step 4	Technical Q&A; & Code Inspection	Review aiController text sanitization regex, authMiddleware security, and db indexes.
